

# MATHEMATICS SEMINAR

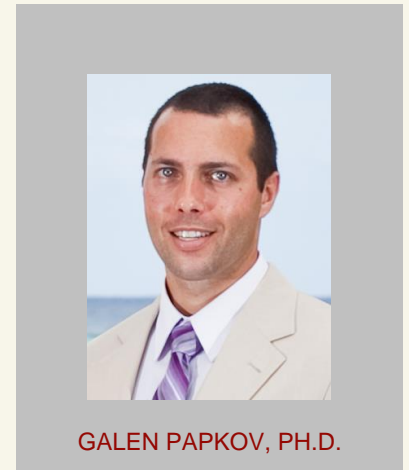

Sponsored by the Department of Mathematics  
Florida Gulf Coast University

## MENTORING UNDERGRADUATES IN RESEARCH

When undergraduates conduct research, they apply knowledge gained in a classroom to problems outside the traditional course setting. It helps foster critical thinking, creativity, and a greater appreciation for the profession at large.

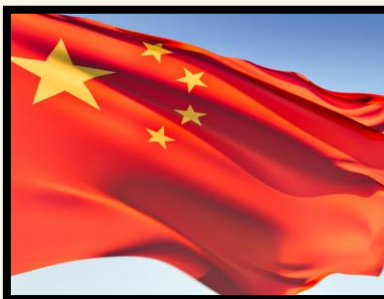

The presenter will discuss his experiences mentoring undergraduates in China in conducting research and will summarize some of the research projects.

Sources for research ideas and advice on how to mentor will also be shared.

**FRIDAY OCTOBER 25, 2013 AT 10:00 AM**

**MERWIN HALL, ROOM 124**

Light Refreshments will be available
