

Mathematics Colloquium

Are you a student interested in beginning a research project in mathematics?

If so, you are invited to attend the first mathematics colloquium of the year. In this seminar, faculty will describe aspects of their research and present some ideas for mathematics research projects suitable for undergraduate and/or graduate students.

FEATURED RESEARCH TOPICS:

- Differential Equations
- Stochastic Processes and Wavelet Transforms
- Domination in Graph Theory
- Nonlinear Differential Equations
- Oysters, Mussels, and Differential Equations

FRIDAY, OCTOBER 24

1:30 pm TO 3:00 pm

AB7 ROOM 220

Sponsored by the Department of Mathematics
Light Refreshments will be available
