Taylor Creek Reservoir

Location

Fortunately, Taylor Creek Reservoir is located only three miles from the Claude H. Dyal Water Treatment Plant and provides additional water supply to Cocoa's system.

Reservoir Reports

- According to a report by Cocoa's engineering consultant CH2M Hill, the Taylor Creek watershed annual runoff is about 36 mgd.
- Estimated capacity of 4 billion gallons of fresh water.

The District permits Cocoa to withdraw an average of 8.8 mgd and a maximum of 12 mgd. Surface water from the Reservoir is blended with the ground water.
